<i>Sector Spotlight: Space Technology</i>	17
<i>Public Analysis / Peer Benchmarking</i>	23

Key Factors That Shaped The Market

Market Trends

Pentagon Priorities

- Border Security and Homeland Defense
- Deterring China and Strategic Competitors (across Maritime, Missile Defense, Space)
- Supercharging the Defense Industrial Base (Shipbuilding, Munitions, Accelerate Acquisition Timelines/Cut Procurement Cycles)
- Technology Modernization & Innovation – 6 Key Technologies (AI, Quantum Computing, Biomanufacturing, Contested Logistics, Directed Energy, Hypersonics)
- Shift from Global Interventionism to Regional Balance of Power; burden sharing with Allies

Defense Spending Multi-Year Supercycle

- Surge due to ongoing geopolitical issues (Ukraine-Russia, MENA, INDOPACOM)
- U.S. Senate passes \$900 billion National Defense Authorization Act (NDAA) for FY26 (key themes: Space Force, Supply Chain, Munitions, Modernization, R&D, Automation)
- NATO members targeting 5% by 2035 (3.5% Core Defense + 1.5% Security-Related)

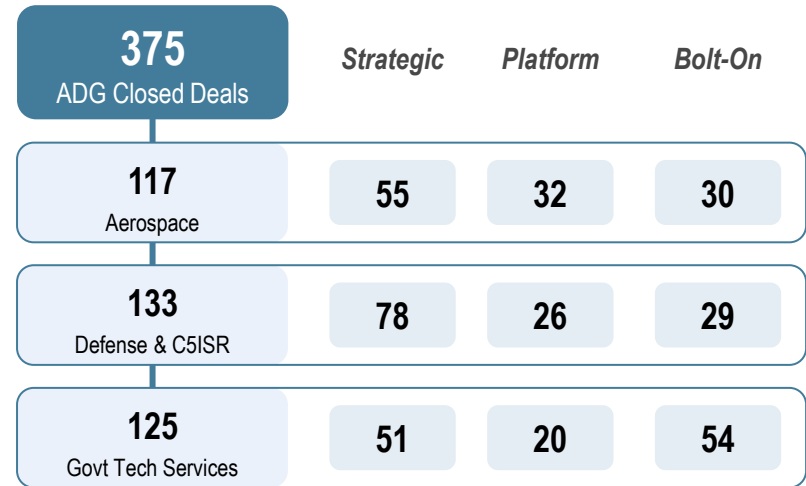

Accelerating Adoption of Advanced Technology

- Record R&D Budget of \$179 billion
- Focus: AI, Autonomy, Hypersonics, Quantum, Space
- Shift to Software-Defined Weaponry, EW and Space-based ISR
- Integration of AI into mission-critical applications

Procurement Change / Pace of Defense Technology Advancements

- The ADG sector is undergoing significant acquisition reforms, driven by the need to accelerate innovation, improve flexibility, reduce bureaucracy, and better leverage commercial technology.
- Shift from custom-built, highly (overly) engineered, costly solutions to nimble, agile, commercially-supported, quick-to-market solutions
- Potential shift to portfolio-based acquisition model with focus on integrated (v. siloed) mission area integration, leverage commercial tech and align with the urgency and speed of technology change.

2025 by the Numbers

Overall

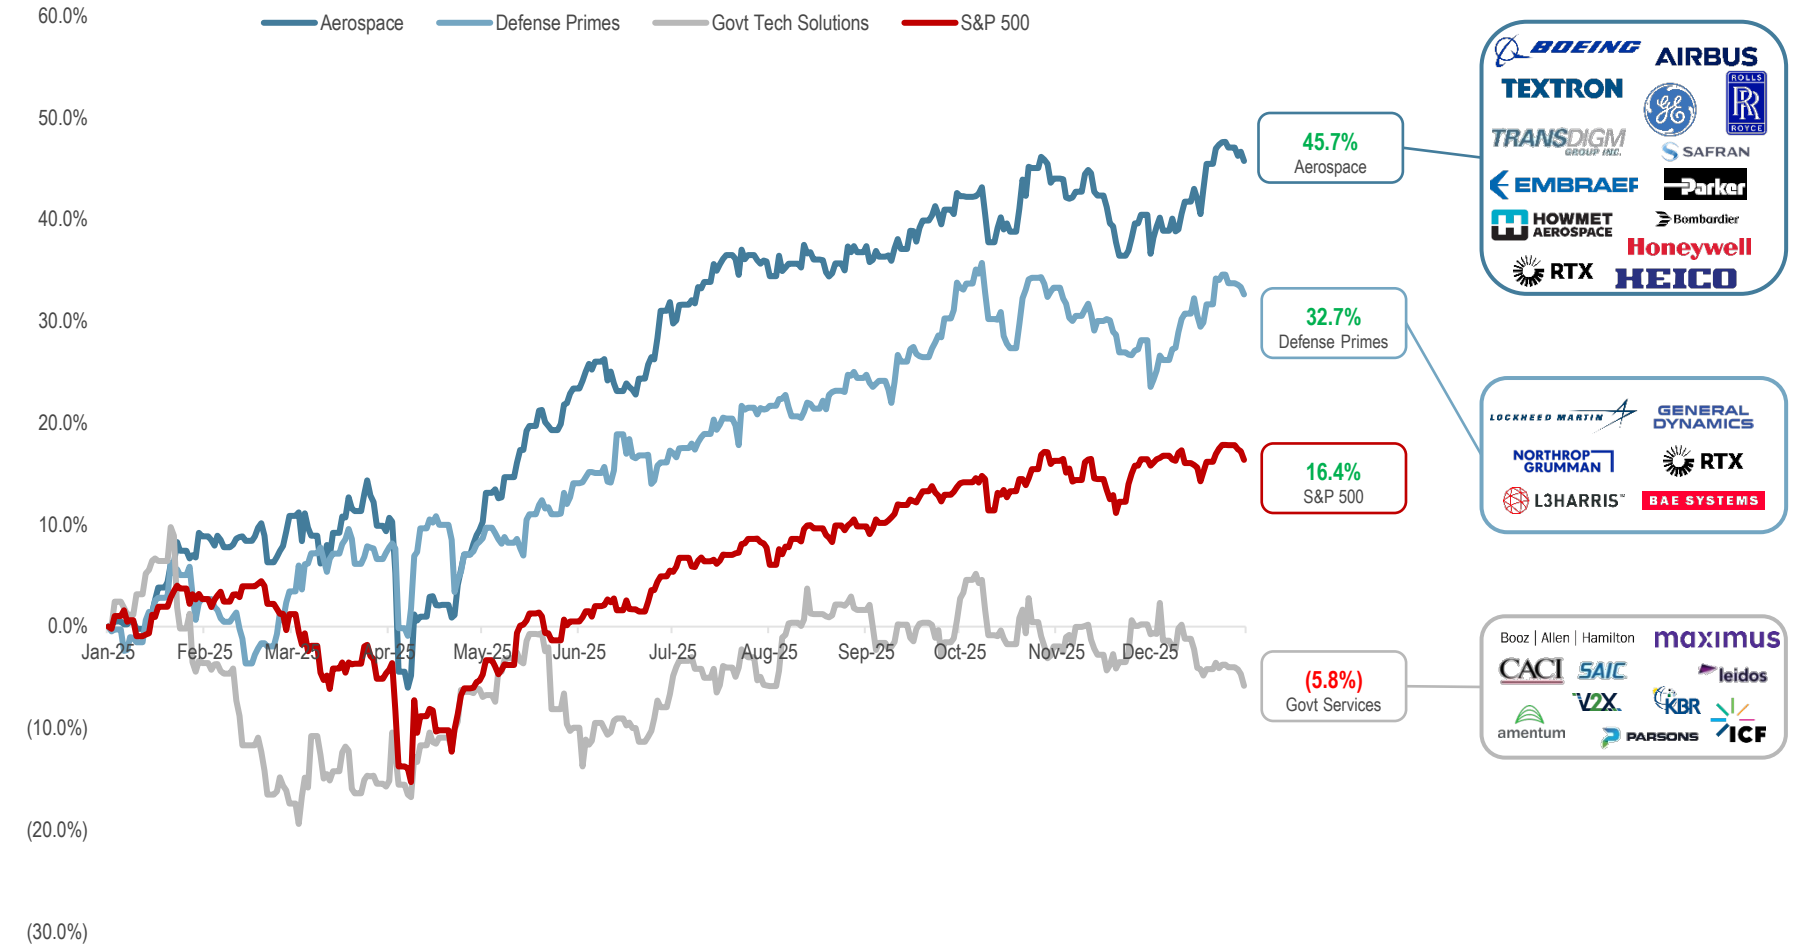

- **Steady M&A Activity:** Budget and geopolitical factors kept ADG demand resilient. Sustained conflicts in Ukraine, continued unease in the Middle East, along with new developments in Venezuela provided a challenging and changing environment where the pace and sophistication of threat vectors continues to expand, which requires continued development and enhancement of the defense force structure and solutions.
- **VC-Based Disruptors:** across multiple defense subsegments (autonomy, space, AI, electronic warfare) continue to move at an accelerated pace, providing intense competitive pressure for existing incumbent systems integrators.
- **Evolving Marketplace:** A myriad of factors impacted the ADG market in 2025, including DOGE, agency closures, contract consolidation, shifts in procurement strategies and a government shutdown, all of which made 2025 a challenging year.
- **Buyers are back,** but standards are high. Deal diligence is as focused as it's every been (backlogs, funding, alignment with govt spending priority areas). There was no shortage of buyers in 2025, but they were extremely picky and there were limited type A assets.

2025 ADG Market Review | M&A Volume

While 2025 Global ADG M&A Volume was only slightly down, it was concentrated on Government Services and during Q2 but recovered in the 4th quarter

Aerospace, Defense & Government Services M&A Volume

Aerospace: remains strong driven by aging fleets, strong travel demand and OEMs (Boeing, Airbus) working through record backlogs. M&A activity driven by aftermarket services, supply chain consolidation, and precision manufacturing

Defense: also remains strong with global rearmament, U.S. stockpile replenishment (Ukraine, Israel) as well as Indo-Pacific tensions (China-Taiwan). **Munitions, ISR platforms, and defense electronics** driving volume. European defense spending is accelerating due to reduced U.S. NATO commitment with global players looking for ways to take advantage.

Government Technology Solutions: strong interest, and valuations, remains for higher-end assets supporting key mission sets and capabilities aligned with shifting government priorities (Cyber, Autonomy, AI)

Space: strong investor interest in space-based platforms, AI-enabled defense systems, and multi-domain autonomy

2024 v. 2025 M&A Volume

2025 YTD M&A volume is down due primarily to the April and May time period which was the height of DOGE, agency dissolution and acquisition and procurement uncertainty.

Segment	2024 v. 2025			
	2024	2025	Chg.	% Chg.
Aerospace	104	117	13	12.5%
Defense & C5ISR	119	133	14	11.8%
Government Services	174	125	(49)	(28.2%)
Total	397	375	(22)	(3.9%)

Government Technology Solutions | M&A Activity

Government Technology Solutions – By Buyer Type

M&A Deal Volume: was down 19.7% in the 2nd Half of 2025 v. 2024 from 76 deals down to 61, as the change of administration, uncertainties around the Department of Government Efficiency, change in procurement strategies and timing, along with agency adjustments all created significant uncertainty in the market.

Strategic M&A declined marginally with 23 deals in the 2nd Half of 2025 v. 29 deals for the same time last year. **PE exits** were minimal with only 3 exits. New **PE Platform** formation was considerably down with only 11 new platforms in the 2nd Half v. 22 in 2024. However Bolt-Ons showed improvement (27 v. 25 the year prior).

Government Technology Solutions | Private Equity Platform Summary

- There were **8** notable Govt Services platforms formed in the **second half of 2025**
- 2026** saw **18** total Govt Services platforms formed v. **32** in **2024**
- There are currently **154** PE-Backed Government Services platforms
- The average tenure of PE exits in **2025** was **4.6 years** after an average of **5.1 years** in **2024**. 2024 and 2025 have seen some notable exits, including:
 - Metrostar Systems** (Blue Delta) acquired by **Veritas**
 - SilverEdge** (Godspeed) acquired by **SAIC** – Hold = 3.8 yrs.
 - CTI** (Bluestone) acquired by **Parsons** – Hold = 4.1 yrs.
 - cBEYONData** acquired by **SMX** (OceanSound) – Hold = 3.4 yrs.
 - IntelliBridge** acquired by **Agile Defense** (Enlightenment) – Hold = 5.7 yrs.
 - AeroVironment** acquired **Blue Halo** (Arlington Capital) – Hold = 5.1 yrs.

Aerospace - By Buyer Type

Notable Aerospace Deals

Date	Acquirer	Target	Divestor	Target Description / Deal Notes
December 2025				<ul style="list-style-type: none"> Designs and manufactures customized, high-performance fans and motors; 100% of revenue derived from proprietary designs €367 million (~\$427m USD) deal; LMB is projected to generate \$60m in revenue and \$30 million in Adjusted EBITDA in 2026 (14x forward EBITDA); 75 employees worldwide
December 2025	 A portfolio company of 			<ul style="list-style-type: none"> AASC and PCX, both Greenbrier portfolio companies combine to form global, unified supplier of precision hardware and systems for aircraft, rotorcraft, satellites, launch vehicles and missile defense Combined company will have 1,300 employees
November 2025				<ul style="list-style-type: none"> HAECO Americas is the second largest heavy maintenance provider in North America behind AAR; heavy aircraft MRO, repair, and overhaul (MRO) and modification services \$78 million deal; expands AAR's maintenance footprint and accelerates the Company's strategic objective to grow its Repair & Engineering segment
September 2025				<ul style="list-style-type: none"> Designs and manufactures high-performance cable assemblies, harnesses, custom overmolded solutions, and molded strain reliefs for various end markets incl. aerospace and space, unmanned aerial vehicles, power infrastructure, and medical/life sciences
August 2025	 A portfolio company of 			<ul style="list-style-type: none"> Provider of surface treatment for highly engineered products in the North American aerospace and defense market. Delivers complex, high-quality metal finishing services, including plating on wire mesh for EMI and RFI shielding, plating on magnesium, large equipment blasting and refurbishment.
July 2025		 Flight Control and Actuation Activities		<ul style="list-style-type: none"> Provides mission critical systems for commercial and military aircraft, and helicopters including 180 platforms Revenue of \$1.5 billion in 2024 and \$130 million in EBITDA; 4,000 employees.
July 2025	 A portfolio company of 	 Subsidiary of Precision Products Machining Group		<ul style="list-style-type: none"> Manufactures fusible plugs and specialty aftermarket components for safety-critical aerospace applications; Serves global aerospace customers with proprietary products and specialized components Enhances Novaria's strategy on enhancing the aerospace supply chain
July 2025	 A portfolio company of 			<ul style="list-style-type: none"> Aviation MRO business based in the UK; specializes in the repair and overhaul of a wide range of avionics, components, and fuel systems PAG's first facility in the EMEA region and is part of the company's broader global growth strategy; enhances ability to serve customers in the region.

Defense & C5ISR – By Buyer Type

Notable Defense Technology & C5ISR Deals

Date	Acquiror	Target	Divestor	Target Description / Deal Notes
December 2025				<ul style="list-style-type: none"> Develops microwave tubes, traveling wave tubes (TWTs), power supplies, microwave power modules (MPMs), klystrons, and switch tubes for private sector and U.S. federal government aerospace and defense markets \$960 million deal; Stellant has \$300 million in Revenue and 950 employees
December 2025				<ul style="list-style-type: none"> Provides high-performance signal-processing technologies; deal will leverage ISA's engineering and signal-processing expertise in strengthening HawkEye 360's rapidly evolving RF platform pushing the combined company towards becoming the industry's central hub for all-domain signals intelligence
December 2025		 Joe Gibbs Mfg. Solutions		<ul style="list-style-type: none"> Manufacturer of precision machined components as well as advanced specialty composites and assemblies for solid rocket motor (SRM) propulsion systems for private sector and U.S. federal government aerospace, automotive, and defense markets.
November 2025	 A portfolio company of TRIVE CAPITAL			<ul style="list-style-type: none"> Designs and manufacturers advanced composites and acoustic materials for the maritime defense industry Acquisition expands Canopy A&D's capabilities in sonar domes and acoustic windows, integrating Tods' expertise with Canopy's broader materials solutions for naval platforms
October 2025				<ul style="list-style-type: none"> Designs and manufactures high-performance cooled infrared cameras and components; acquisition further integrate AIRS's advanced hardware into Anduril's portfolio of sensing systems, expanding range and capability of technologies
September 2025				<ul style="list-style-type: none"> Provides shortwave infrared (SWIR) and midwave infrared (MWIR) imaging systems and laser sensing technologies and sensors for private sector and U.S. federal government aerospace and defense markets
July 2025				<ul style="list-style-type: none"> Designs and manufactures advanced RF and microwave components and subsystems for the defense and commercial end markets Highly engineered solutions which facilitate the conditioning, management and transfer of RF and microwave energy in demanding operating environments across a variety of electronic warfare, signals intelligence, radar, communications and test and measurement applications
July 2025	 A portfolio company of ARCLINE	 Naval Propulsors and Handling Businesses		<ul style="list-style-type: none"> Acquires Rolls-Royce Naval Marine business, gaining key naval manufacturing assets like facilities in Pascagoula, Mississippi, and Walpole, Massachusetts Deal enhances U.S. Navy support with propellers, waterjets, and handling systems

Government Investments and Commercial Innovation Fuel U.S. Space Technology Expansion

U.S. Space Technology Overview

- The U.S. space technology market is valued at \$254 billion in 2025 and is projected to reach \$483 billion by 2034, reflecting a CAGR of 7.38%
- U.S. dominates the global space market with the largest market share of 49.60% in 2024
- The U.S. space technology market is witnessing significant growth due to:
 - Increased government spending on exploration and defense
 - Advancements in AI, space exploration capabilities, and reusable launch vehicles
 - Emergence of new commercial opportunities in communications and earth observation satellites
 - Increasing demand for satellite services for connectivity & global internet

U.S. Space Technology Market Size

U.S. Space Technology Market Trends

Government Investments Driving Market Growth

- Public-sector spending on space programs is at record highs, signaling strategic importance for digital economies and defense
- U.S. Space Force budget holds at \$29.4B for FY2025, sustaining launch and missile-warning programs

Miniaturization Enables Affordable Constellations

- Advances in microelectronics and additive manufacturing have cut small-satellite costs below \$200K, shifting from single spacecraft to scalable fleets
- Starlink's 7,556 satellites generating \$12.3B from 7.6M users affirming the constellation model

Surging Demand for High-Throughput Low Earth Orbit (LEO) Broadband

- LEO networks are filling connectivity gaps for remote communities, maritime, and defense
- Governments are adopting commercial LEO links for emergency response, signaling a shift from building proprietary constellations to treating bandwidth as a utility
